

## PROJECT PROFILE » DOMINION

### PROJECT TYPE:

230kV Transmission Maintenance

### PROJECT SCOPE:

Perform system-wide maintenance for Dominion's transmission system.

### DESCRIPTION:

- » We have two transmission line crews working on time and equipment basis for Dominion performing miscellaneous upgrades.
- » Our resources are involved in projects ranging from line inspections and repairs, to 230kV conductor upgrades, to pole replacements.
- » We also perform a significant number of switch installations and reconductoring projects.
- » While voltage varies based on what part of the system needs maintenance, most projects are 230kV.
